

Specifications and weight of hot-dip galvanized photovoltaic bracket

What is solar photovoltaic bracket?

Solar photovoltaic bracket is a special bracket designed for placing, installing and fixing solar panels in solar photovoltaic power generation systems. The general materials are aluminum alloy, carbon steel and stainless steel. The related products of the solar support system are made of carbon steel and stainless steel.

What is hot dip galvanized steel photovoltaic mounting system?

Hot-Dip Galvanized Steel photovoltaic mounting system is typically applied on flat open field ground. Main components are high pre-assembled in our factory, which save lots of your on site installing time and cost. Components are full sides anodized even for small parts, which has a great anti-corrosion effect and long lifetime.

What are the technical difficulties in assembling section steel brackets?

In short, there are many technical difficulties in the production process of the assembled section steel bracket, which requires metallurgical engineering and technical personnel to overcome technical barriers and further reduce its use cost.

Steel bracket-Hot dip galvanizing: Stable performance, mature manufacturing process, high bearing capacity, easy installation, widely used in civil, industrial solar photovoltaic and solar power stations. Among them, the section steel is ...

If you're going to buy high quality hot-dip galvanized steel photovoltaic mounting system at competitive price, welcome to get pricelist from our factory. We're well-known as one of the leading hot-dip galvanized steel photovoltaic mounting ...
