

# Specifications for the base plate hook of photovoltaic bracket

What are the dimensions of a roof hook?

Dimension: Base plate: 140x55x5 mm, Height under bracket: 49-58 mm, Bracket height: 57-76 mm, Total height: 128-156 mm. Material: Stainless steel (1.4016) Roof hooks with 3 height adjustments in the base plate (40/47/54 mm) and slotted hole in the bracket for vertical SolidRail mounting.

What is a power rail PV module mounting system?

The PV module mounting system engineered to reduce installation costs and provide maximum strength for parallel-to-roof, tilt up, or open structure mounting applications. The POWER RAIL mounting system is designed with the professional PV solar installer in mind.

How big is a solidrail bracket?

Bracket with long hole for SolidRail mounting with T-bolt screw and hexagon flange nut M10. Base plate: 180x80x4 mm, Height under bracket: 38 mm, Bracket height: 69 mm, Total height: 124 mm, Bracket depth: 91 mm. Material: stainless steel (1.4016) Adjustable Roof Fastener SolidHook Vario 1 for Pan Tile.

How to understand solar mounting system's datasheet?

When aiming to understand solar mounting system's datasheet, professionals must be wary of common pitfalls: Overlooking Environmental Factors: Ensure that the mounting system is suitable for the local climate and geography. Ignoring Compatibility: Check that the mounting system is compatible with the solar panels and the installation site.

What are the components of a solar mounting system?

Solar mounting systems comprise several components: Mounting Brackets: These secure the solar panels to the mounting structure, ensuring stability. Rails: Rails provide a base for mounting the solar panels, acting as the backbone of the structure. Clamps: Clamps secure the solar panels to the rails, ensuring they are held firmly in place.

How framed PV modules can be installed on a trapezoidal metal sheet roof?

rainless system facilitates the rapid mounting of framed PV modules on trapezoidal metal sheet roofs with minimum thickness 0.8 mm. Only three components are required to install the modules directly to the roof. A base mounting clip is 100 mm or 140 mm long, therefore easy to carry and attach to almost all trapezoidal and sandwich roofs.
