

Standard dimensions of rooftop photovoltaic panels

How big should a rooftop solar system be?

A common configuration for an array of this size might be 10 rows of 25 panels each. Using the average solar panel size of 6 feet by 3.25 feet, and assuming you leave minimal space between the panels, your rooftop solar system would measure roughly 4,875 square feet. Now, let's consider the weight of that system.

What size are solar panels?

While the size for solar panels with the same cell count varies slightly, most 60 cells solar panels have size rounding the 39 in. x 66 in. and 72 cells solar panels have sizes of around 39 in. x 77 in., but panels with cell counts of 96, 120, and 144 may have different sizes.

How much do solar panels weigh on a roof?

It is also important to consider the weight of installing solar panels on your rooftop. On average, mounting equipment and solar panels weigh two to four pounds per square foot. "In terms of weight, it has little impact on your roof, as it's built to support much heavier infrastructure.

How big are commercial solar panels?

On the other hand, commercial solar panels typically feature 72 cells, with dimensions of approximately 3.25 feet by 6.5 feet. These panels cover an area of 21.13 square feet and weigh about 50 pounds. These larger panels are often chosen for more extensive solar projects.

How big is A 72-cell solar panel?

The average 72-cell solar panel size measures 3.25 feet by 6.42 feet and is laid out as a 6 x 12 grid, making them almost a foot taller than the 60-cell standard size panels. Given their large physical size, 72-cell solar panels may be awkward to carry, which is why two people are often required for installation.

How much roof space does a solar panel need?

Since solar installations vary greatly, providing an exact space estimate without a professional assessment is difficult. However, if the average solar panel is 17.5 square feet and produces 250-400 watts, you will need about 1 square foot of roof space for every 14-23 watts of output.
