

Starring in the State Grid microfilm

How many pages of federal records have been microfilmed?

NARA has microfilmed millions of pages of permanently valuable Federal records. For information on what records have been microfilmed, see the listing of NARA microfilm catalogs.

Which records are good candidates for microfilming?

These records are good candidates for microfilming as storage space can be greatly reduced and vital records can be protected. Records with research value are good candidates for microfilming. For some records research value may be obvious, but for other records it may take a careful review of the records.

How much does microfilm cost in New York?

Conversely, at a price of at least \$100 per roll, it does not make economic sense to microfilm lightly used records with a life span less than 10 years. The New York State Archives, other state agencies, or internal records schedules identify records series with permanent retention.

Is NARA a candidate for microfilming?

NARA has some holdings in which a few records are referenced often enough to cause wear and tear. Such records are candidates for microfilming. Most records are not used often enough to justify microfilming. NARA has microfilmed millions of pages of permanently valuable Federal records.

How do I report a digitized microfilm publication?

Original records that have been digitized for which there is no microfilm will have "Original records" listed in the microfilm publication number column. If you experience any issues with the information on this page, please report it to digitization@nara.gov. Click the column headings to sort or download the spreadsheet to view on your computer.

What should a local government consider when starting a microfilming project?

When beginning a microfilming project, the local government should be aware that the quality of the end product will often be determined by the amount and quality of time spent supervising a project. Quality control not only includes the technical issues of resolution, density and reduction ratio but extends to every aspect of the project.
