

Tax rate for wind power plants

How do tax incentives affect wind turbine installations?

The timing and magnitude of wind turbine installations in the United States are often driven by tax incentives. The U.S. production tax credit (PTC), a per-kilowatt-hour (kWh) credit for electricity generated by eligible renewable sources, was first enacted in 1992 and has been extended and modified in the years since.

What is the wind production tax credit?

The wind production tax credit is a 2.3 cent per kilowatt hour tax credit for the first 10 years of production for wind generation. Under the phase out of the credit approved by Congress, the tax credit decreases by 20 percent per year from 2017 through 2019.

How much does wind energy cost?

According to the latest market reports from the U.S. Department of Energy Wind Energy Technologies Office, capital expenditures for: Land-based wind energy was about \$1,200 to \$1,800 per kilowatt (kW), roughly equal to costs in the early 2000s after a 40% dip from a 2009 peak. Offshore wind energy was about \$3,500/kW to \$4,000/kW.

Are wind projects eligible for tax credits?

Accordingly, wind projects placed in service after Dec. 31, 2021, are eligible to receive tax credits at full value, rather than the reduced values under the old law. The PTC extension comes at a price.

What are the economic benefits of wind energy?

Wind energy projects provide many economic benefits, including direct and indirect employment, land lease payments, local tax revenue, and lower electricity rates—plus other financial incentives. Although these benefits depend on factors such as location, size, and ownership, the overall economic impacts of wind energy development are easy to see.

How does the wind facility tax credit work?

IRS by 20%. The credit is reduced by 40% for wind facilities that began construction in 2018, reduced by 60% for facilities that began construction in 2019, and reduced by 40% for wind facilities that begin construction in 2020.

According to the Joint Committee on Taxation, the production tax credit for wind is estimated to cost taxpayers \$4.9 billion in fiscal year 2020, the investment tax credit for solar is estimated to cost \$2.4 billion, and the three ...
