

# Tesla Solar Tile Power Plant

What is Tesla Solar Roof?

Tesla Solar Roof is designed to maximize your roof's energy production without compromising the aesthetics of your home. Solar Roof is constructed with a combination of glass solar tiles and architectural-grade steel tiles. Each tile is virtually indistinguishable in color and trim.

How many kilowatts does a Tesla Solar Roof generate?

A 1,175-square-foot roof has enough solar-harvesting tiles to generate 7.6 kilowatts of power. The Tesla Solar Roof uses a mix of solar tiles and dummy tiles; the latter used at the edge of the installation to enable teams to more easily cut edge tiles down to size and fit the roof seamlessly to the house.

How does Tesla's new solar tile work?

The new tile features a higher max power output of 71.67 watts: With more efficient solar cells, Tesla managed to maintain the same tile size with a 22% increase in max power output. It will enable Tesla to fit more solar power with fewer solar tiles on a single roof.

Why is Tesla launching a new solar roof tile?

Tesla is launching a new solar roof tile with greater efficiency and higher power capacity. It comes as Tesla is trying to make its solar products mainstream. Tesla has had ups and downs when it comes to the solar roof. The product has been widely recognized for its beautiful design.

What is Tesla's 'beautiful' solar roof tile?

Tesla's 'Beautiful' solar roof tile has quietly rolled out an higher powered version of its solar roof tile, with a significant boost in capacity and a brand new option to overlay the integrated PV glass tiles onto certain types of existing roofs.

Does Tesla have a warranty on solar roof tiles?

It makes switching to solar energy sleeker by replacing regular roof tiles with energy-generating solar roof tiles, instead of having to install bulky solar panels. Tesla offers a 25-year warranty on the tiles and takes end-to-end responsibility for installing the new solar roof.

A Tesla Solar Roof offers a unique dual-functionality. Solar Roof tiles look much like regular roof tiles, but they're made of tempered glass and contain photovoltaic cells that collect solar energy and convert it into electricity ...
