What drives microgrid development?

Resilience, efficiency, sustainability, flexibility, security, and reliability are key drivers for microgrid developments. These factors motivate the need for integrated models and tools for microgrid planning, design, and operations at higher and higher levels of complexity.

What is a microgrid & how will it work?

The microgrid will be operational and provide power to the critical loads for at least two weeks with on-site fuel. Upon restoration of utility power, critical loads will be seamlessly reconnected to the utility grid. As much of the existing clean energy as is technically feasible will be incorporated into the microgrid.

What are the key components of advanced microgrid design?

Key components of advanced microgrid design include identifying and prioritizing critical assets, defining design basis threats, and establishing performance goals.

What information should be included in a microgrid project?

The key data includes electrical drawings, information on critical loads, utility load information, and utility cost information. Once the background information has been reviewed, the project team should begin initial stakeholder consultations. Implementing a successful microgrid requires participation by many stakeholders.

What information is provided in NREL's microgrid design process?

NREL's microgrid design process For each step in the process this report provides practical information for DoD stakeholders, including information to gather, analysis to be conducted, available tools, examples from DoD projects, and lessons learned. Specific examples of the types of information provided include:

What makes a successful microgrid design?

Microgrids are most successful when utilities and third-parties work together to gather foundational information upfront and engage with stakeholders. Download this framework to guide you through the entire design process from project roles to operating procedures. Understand how to gather the information vital to a successful microgrid design
