

The latest technology of solar power generation in China

What is the future of solar energy in China?

China has already made major commitments to transitioning its energy systems towards renewables, especially power generation from solar, wind and hydro sources. However, there are many unknowns about the future of solar energy in China, including its cost, technical feasibility and grid compatibility in the coming decades.

How much solar power does China have in 2023?

China added almost twice as much utility-scale solar and wind power capacity in 2023 than in any other year. By the first quarter of 2024, China's total utility-scale solar and wind capacity reached 758 GW, though data from China Electricity Council put the total capacity, including distributed solar, at 1,120 GW.

How big is China's solar & wind power capacity?

Wind and solar now account for 37% of the total power capacity in the country, an 8% increase from 2022, and widely expected to surpass coal capacity, which is 39% of the total right now, in 2024. Cumulative annual utility-scale solar & wind power capacity in China, in gigawatts (GW)

Does China need more solar power to reach its climate target?

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target. Similarly, global demand for PV products will not cease.

Does China have a solar industry?

And despite all the turmoil, the Chinese solar industry has the manufacturing capacity to meet the demand. Discover all statistics and data on Solar energy in China now on [statista.com](https://www.statista.com)!

Does China have solar energy potential?

The research team developed an integrated model to assess solar energy potential in China and its cost from 2020-2060.

The findings show solar PV is an enormous resource for China's decarbonization. They then demonstrated its cost-competitiveness, with 78.6% of the potential in 2020 equal to or lower than current prices of local coal-fired power, a share ...
