

The quality of Jinergy photovoltaic panels

What is the efficiency of jinergy photovoltaic panels?

The efficiency of Jinergy's photovoltaic panels is very high, thanks to the choice of HJT (heterojunction) technology, which combines the best qualities of crystalline silicon with amorphous thin-film silicon. In 2019, the efficiency of HJT photovoltaic cells from this manufacturer reached 24.73%.

Can jinergy solar panels be used in a photovoltaic farm?

Jinergy solar panels, due to the efficiency of their HJT technology, can be used in a photovoltaic farm. In installations with a capacity of over 30kWp, the profitability of the investment is crucial. Jinergy modules, when used with a SolarEdge or Kehua inverter, can pay for themselves within up to 6 years.

What is jinergy's warranty on solar panels?

Jinergy offers a 30-year warranty against linear power loss for its solar panels. This means that if nothing happens to the solar panel after 30 years, its power should still be at a high level of 85.9%.

What makes Jinergy a good solar panel company?

Jinergy is a good solar panel company due to its focus on high-quality workmanship and the latest technological solutions. The company implements intelligent production management systems, automation, MES, ERP, etc., which results in the highest level quality of its photovoltaic modules. Jinergy manufactures plants of silicon cells (N-Type, HJT panels) and HJT photovoltaic modules.

Why is HJT a good solution for photovoltaics in farms?

The HJT panel is a good solution for photovoltaics in farms due to its bifacial technology, which produces up to 35% more energy than traditional panels. It also generates energy from below using ALBEDO. The Jinergy silicon cell bifacial coefficient is one of the highest in the industry and amounts to as much as 85%.

Why is Jinergy a good choice for poultry farms?

Jinergy is a good choice for poultry farms due to its resistance to salt spray, ammonia, and increased resistance to moisture. HJT panels have an ideal ratio of return on investment up to 5 years for 50kWp sets on poultry farms, considering local funding, government programs, or tax relief.

The quality of Jinneng photovoltaic panels
