

# The reason why photovoltaic panels do not leak when laid

Why does my roof leak after installing solar panels?

There are various reasons your roof could leak after installing solar panels. They mostly have to do with poor installation where mounting holes are not sealed properly, the top is incompatible with solar panels, or the roof is old and not designed for solar panels.

What happens if solar panels are not installed properly?

Issues such as leaks, broken tiles, and structural damage can occur if the panels are not installed properly. To avoid roof damage, working with experienced installers who understand the intricacies of solar panel installation is essential. They will know how to secure the panels without compromising the integrity of your roof.

Can solar panels protect your roof from water leaks?

While solar panels can protect your roofs, if you install the solar panels when the roofs are in bad shape, you would end up in more trouble. While the panels won't protect the roof from the leak, it would be tough for you to revamp your roof after installing the solar panels. How to identify and fix the solar water leaks on the roof?

Can solar panels damage a roof?

Yes. Though poor installation can damage your roof, a properly installed one can protect your roof from the harsh climate. Too much sun and rain could damage your roof and increase the likelihood of a leak, and your solar arrays may protect your roof from wear and tear.
