

The solar powered light is not very bright

Do solar panels get brighter at night?

The direction of your solar panel will make a massive difference in how bright its light will be at night. As solar panels require large amounts of sun exposure to power the light, the more exposure they get, the longer and brighter they will shine.

Why are my solar lights not bright?

As direct sunlight needs to pass through the solar cell cover to reach the photovoltaic cells, it will need regular care. Before you fully replace any covers, try to clean them with a soap and water mixture, as this could be the main reason why your solar lights aren't as bright as they can be.

Why is my solar light not working?

There Is ON/OFF Button & It's not turned ON Most of the outdoor solar garden lights come with ON/OFF button, and that button needs to be turned ON. In many cases this simple thing is ignored by many people and this is one of the main reasons why your solar light isn't working as expected.

Can a faulty battery affect a solar light?

Much like old bulbs impacting solar lights, old or faulty batteries can also largely impact the performance of your solar light. A battery that is low on juice or just faulty won't be able to use its absorbed solar power to provide enough power to the bulb.

Why is my solar garden light not working?

Most of the outdoor solar garden lights come with ON/OFF button, and that button needs to be turned ON. In many cases this simple thing is ignored by many people and this is one of the main reasons why your solar light isn't working as expected. There might also be a factory defect and the light doesn't turn ON. 2.

What if solar panel is not getting sun light?

If solar panel not getting the required sun light than the LED won't work or can't produce the brightest light as you would have expected. Make sure you place your light at a location where it gets direct sun light.
