

Things to note when installing photovoltaic panels on construction sites

o Perform visual checks at least once a year. A panel that changes visually does not change for the better. o Clean panels if they get excessively dirty to avoid hot spots. Panels should not be exposed to partial shading (bird droppings, ...

Even though many homeowners are in a hurry to take advantage of the 30% federal tax credit for new solar installations (which expires at year end), you still have time to do your due diligence. This handy article from TechBullion dives ...
