

Three Gorges New Energy Storage Project Bidding

Is Three Gorges building a solar park?

Three Gorges is building the park in stages, in cooperation with Inner Mongolia's Mengneng Group. The initial phase involves the construction of 1 GW of solar and corresponding storage capacity, Three Gorges said in a statement. It did not share any details about the expected completion project date.

How much power will Three Gorges have?

Upon completion of all construction phases, the installation will feature 8 GW of solar and 300 MW/600 MWh of storage, as well as 4 GW of wind and 4 GW of upgraded coal capacity, according to China's state-run Xinhua news agency. Three Gorges is building the park in stages, in cooperation with Inner Mongolia's Mengneng Group.

Will China's 3 Gorges new energy build a solar-plus-storage mega-project in Inner Mongolia?

China's Three Gorges New Energy has started building the first 1 GW phase of solar-plus-storage capacity for a planned 16 GW mega-project in Inner Mongolia's Kubuqi Desert. Upon completion, the massive installation will include 8 GW of solar, 4 GW of wind, and 4 GW of upgraded coal capacity.

Why is the Three Gorges Project important?

The Three Gorges Project, the largest hydro-engineering project in the world, contributes greatly to socio-economic benefits in China, including flood control, water supply, electricity generation, navigation, etc. (Fu et al. 2010; Zhao 2013; Temoka et al. 2016; Shi et al. 2017).
