

Top 10 countries for solar power generation

Which countries use the most solar energy?

Our rundown of the countries around the world using the most solar energy, from Mexico to China. China consumes more solar energy than any other country, by far. The nation used 32.3% of the world's solar energy in 2022 - more than double the US's 15.6%.

Which country installs the most solar power in 2022?

While China, the US, and Japan are the top three installers, China's relative contribution accounts for nearly 37% of the entire solar installation in 2022. Fig. 1 illustrates the contribution of energy sources to both electricity generation and total installed power capacity by 2050.

Which country produces the most solar energy in 2023?

China was the top solar power producer last year, but it's not the only nation that saw a big leap in solar production. Solar energy continued to surge and break records across the globe in 2023, generating an estimated 5.5% of global electricity, a total of 1,631 terawatt-hours.

Which country has the largest solar energy capacity?

China has the largest solar energy capacity in the world, at 306,973 MW, which is 35.8% of the entire world solar capacity. What is the global capacity of solar electricity? According to PV Magazine, the world had installed around 1 TW (terawatt) of solar capacity as of March 2022. How many MW are in a TW? One million megawatts!

Which countries are generating the most solar energy in 2021?

In 2021, global solar PV generation increased by a record-breaking 22%! 1. Australia 2. Japan 3. Netherlands 4. Israel

Which countries are leading the solar energy transition?

Overall, the Asia Pacific region is leading the solar energy transition, with six countries in this region: China, Japan, India, Australia, South Korea, and Vietnam, ranking among the top 15. Asian countries are making a concerted effort to transition to renewable energies, given their high energy demand and heavy reliance on coal for energy.
