

Total installed capacity of wind power generation

How much wind power is installed in 2022?

Globally, 77.6 GW of new wind power capacity was connected to power grids in 2022, bringing total installed wind capacity to 906 GW, a growth of 9% compared with 2021. The world's top five markets for new installations in 2022 were: Altogether, they made up 71% of global installations last year, collectively 3.7% lower than 2021.

How many MW of wind is installed in 2021?

The U.S. wind industry installed 13,413 megawatts (MW) of new wind capacity in 2021, bringing the cumulative total to 135,886 MW. This is the second-highest amount of wind capacity installed in one year (behind 2020), and represents \$20 billion of investment.

How much wind power is there in 2023?

The cumulative capacity of installed wind power worldwide amounted to approximately 1,021 gigawatts in 2023. Onshore wind power accounted for the majority of total wind power capacity, at about 946 gigawatts that year. Which country has the largest wind market?

How much wind power does the United States have?

In another major milestone, the United States passed 150 Gigawatts of total wind capacity, but the market was much weaker than in the previous year, adding only 6.4 Gigawatts - much less than in 2022 and in 2021, when 13.7 GW were added, more than double the capacity of 2023.

How many wind turbines are there in the US?

The U.S. distributed wind sector--which includes power from wind turbines installed near where the power will be used--added 11.7 MW of new distributed wind energy capacity with 1,751 new wind turbines installed across 15 states.

How much wind power does the world need?

The world's installed wind power capacity now meets around 10% of global electricity demand - another important milestone. More than ten countries now have a wind power share of more than 20%, led by Denmark, which generates an astonishing 56% of its electricity from wind.

The U.S. wind industry installed 13,413 megawatts (MW) of new wind capacity in 2021, bringing the cumulative total to 135,886 MW. This is the second-highest amount of wind capacity installed in one year (behind 2020), and represents ...
