

# Universities in China that conduct microgrid research

How has Microgrid technology developed in China?

The research on domestic microgrid technology started late, but microgrid technology has achieved certain achievements in China with the deepening of research and development in recent years. In terms of universities, both Tianjin University and Xi'an Jiaotong University have designed and implemented a small microgrid laboratory structure.

When did Tsinghua University start a microgrid project?

In September 2005, Tsinghua University signed a cooperative research agreement with Liaoning High Tech Energy Group Co., Ltd., establishing China's first microgrid Research Institute. In 2006, Tsinghua University worked with the State Key Laboratory of Power Generation Equipment Control and Simulation to build a microgrid experimental platform.

What is the research on DC microgrids in China?

From 2009 to 2016, research on DC microgrids in China has gradually involved many different aspects, such as the study of DC microgrid power electronic converters, DC circuit breakers, and other key equipment, as well as operation control technology, protection, and energy management. 1.2 China's Current and Planned Policies Regarding MG

Will China's distributed energy Microgrid technology reach the International Advanced Level?

It is predicted that by 2020 China's distributed energy microgrid technology will reach the international advanced level. As domestic and foreign supply and demand conditions are difficult to balance in the short term, the microgrid industry has a strong market demand.

What is China doing with AC microgrids?

With the continuous deepening of research, experience has been accumulated in China in the planning and design, operation control and energy management of AC microgrids. In more recent years, Chinese scholars began to simulate DC (direct current) microgrids.

Which countries have done research on Microgrid technology?

In terms of microgrid technology research, relevant scientific research units in Europe, America, and Japan have completed some basic theoretical research on the technology, and established a series of microgrid laboratory systems and microgrid demonstration projects.
