

Use Coke bottles to generate solar power

Are empty soda cans a good idea for a DIY solar project?

Below is a DIY solar project featuring empty soda cans that might fit the bill. Having photovoltaic (PV) systems installed at your home is the simplest and most effective way to harness solar electricity, and GVEC Home® offers professional solar installation services.

How do solar bottle light bulbs work?

Light is produced when the water inside the bottle bulb refracts and spreads the light inside the house. So far 643 solar bottle light bulbs have been installed and the goal is to reach a million in 2012. You can help their efforts by donating here. What do you think of this amazing invention?

Can a soda bottle be used as a light bulb?

Demi(aka Solar Demi),who comes from a very small village in the Philippines,came up with a solution to bring light to his village by turning a soda bottle into a light bulb.

How do you use soda cans on a solar panel?

The cans are your solar panel cells. Start by cutting the top off of each clean,dry can with a hole saw or a can opener. Then,cut a fin or star into the bottom. This creates a turbulent airflow through the soda cans,which can help to accumulate more heat within the panel. Be extremely cautious when prepping the soda cans.

How do you make a solar bottle bulb?

To construct a solar bottle bulb, you'll first need to find an empty plastic soda bottle, a gallon of distilled water, a gallon of bleach, some household sealant, and some sheet metal. Once you've acquired all your materials, cut a hole in the sheet metal and slide the bottle through.

How to use a solar bottle lamp?

Take an empty soft drinks bottle and clean it thoroughly. Fill the bottle with water and add a few drops of chlorine to avoid algae formation. Close the bottle with Solar Bottle Lamp and your lamp is ready. Before first use, charge the battery by placing the bottle lamps in bright sunlight for at least a day.

It's just another Coke sold, except that the sale has been made in a village that doesn't have any electricity. As the thirsty villager gulps down the fizzy chill gushing out of the bottle, Coca-Cola India moves another step closer ...
