

How framed PV modules can be installed on a trapezoidal metal sheet roof?

rainless system facilitates the rapid mounting of framed PV modules on trapezoidal metal sheet roofs with minimum thickness 0.8 mm. Only three components are required to install the modules directly to the roof. A base mounting clip is 100 mm or 140 mm long, therefore easy to carry and attach to almost all trapezoidal and sandwich roofs.

What materials are used for mounting base brackets?

Mounting base brackets are fabricated from Series 6000 structural marine grade aluminum. 5/16" hardware included. "L" Feet are fabricated from high-strength 3/16" aluminum and include a vertical slot for adjusting to irregular surfaces. 5/16" coated hardware included. "L" Feet are fabricated from high-strength 3/16" aluminum.

Can a PV awning replace a planned architectural shading element?

We worked with Power Structures to create a PV awning that replaced a planned architectural shading element on a new home. Not only did the new PV array provide the needed shading to summer fenestration, but provided 4.8kW of power to boot- all at a cost REDUCTION from what was initially planned.
