

# Western Solar Power Generation Stocks

Should you invest in solar energy stocks in 2024?

Investing in solar energy stocks in 2024 presents an opportunity due to several factors. The global push for renewable energy sources intensifies, with a heightened focus on combating climate change and reducing carbon footprints. Solar energy remains a pivotal component of this transition towards clean energy solutions.

Why are solar energy stocks growing?

The industry's technological advancements and decreasing production costs make solar energy increasingly competitive against conventional energy sources. In addition, government incentives, supportive policies and increasing consumer demand for sustainable energy further drive the growth prospects of solar energy stocks.

Is SunPower a good stock for 2024?

SunPower is committed to advancing renewable energy solutions and sustainability, aiming to create efficient and environmentally friendly solar energy systems for many customers. SunPower stands out as a prominent energy stock for 2024 due to its focus on renewable energy solutions, particularly solar power.

How did solar energy stocks perform in 2023?

Solar energy stocks took a beating in 2023. Global X Solar ETF (RAYS) and Invesco Solar ETF (TAN) are down 41.38% and 29.83% for the year, respectively. The high-interest rate environment made a bearish case for solar stocks throughout the year due to a demand drop among retail customers.

Should you invest in energy stocks?

Diversification in stock investments offers several key benefits. Firstly, it helps mitigate risks associated with a specific sector's volatility, as energy stocks might respond differently than other stocks to market conditions. For instance, balancing solar stocks with consumer staples and tech can offset the impact of solar demand.

Is the broader investment climate boding well for solar energy?

The shift in the broader investment climate is boding well for solar energy and the broader renewable energy sector. According to data from BloombergNEF, global renewable energy investment has already set a new record in 2023 in the form of record inflows for the first half of the calendar year.
