

# What is the foreign trade name of photovoltaic bracket

Why is international trade important for PV cells?

Through the interaction of spatial patterns of PV cells international trade flow, the associations among regions have been strengthened and the development opportunities of PV industry have been expanded. This will also intensify the level of competition.

What is the spatial structure of PV cells international trade?

Nodes (countries and regions) and routes(trade flows) are two major metrics for the spatial structure of the PV cells international trade. Demand and supply of PV cells take place in each individual node. Consequently,the interactions amongst nodes are responsible for the formation of routes.

What are bifacial solar panels?

Bifacial solar panels that absorb light and generate electricity on each side of the panel and that consist of only bifacial solar cells that absorb light and generate electricity on each side of the cells. Quota Bulletins (QB) are posted at and updated as determined by future announcements.

Can versol mount a photovoltaic power station?

Versol's V-Basic mounting system can be applied to photovoltaic power station in different terrain and environment. The product range includes a wide range of models and styles, and is highly adaptable.

After years of study and after having gained specialized experience in the field with over 5,000 customers for whom we have produced more than 100,000 brackets, our technicians have created the "perfect bracket" for fixing ...
