

What is the line of GCL Integrated Photovoltaic Panels

Who is GCL system integration technology?

GCL System Integration Technology strives to be the world's leading integrator of comprehensive energy systems.

What does GCL do?

GCL targets at making PV-generated electricity affordable and inclusive for the public by its constant technology innovations in polysilicon, silicon wafers, cells, modules, system integration and photovoltaic power plants, continuous improvement of its management, regional layout and green energy certification systems.

Does GCL-Si have a 320 W perovskite solar module?

GCL-SI has launched a new 320 W perovskite solar module. The company guarantees that the 10-year end power output will be at least 90% of the nominal output power, which decreases to 80% after 25 years. GCL System Integration (GCL-SI), the PV panel unit of GCL Group, unveiled a perovskite solar module at the SNEC trade show in Shanghai in May.

Where is GCL launching a new PV module base in 2020?

GCL announced a new PV module base in east Hefei City, Anhui Province in 2020, with a total planned module capacity of 60 GW. Construction started on Phase I of this project in December, with a capacity of 15 GW.

When did GCL begin selling solar PV plants?

GCL started selling solar PV plants in 2018. By the end of June, they had sold over 6 GW of solar PV farms, significantly lowering the liabilities and debts of the entire GCL group, including GCL System Integration. This has given GCL a much better financial position for future development.

Does GCL sell bifacial solar cells?

GCL showcased various PV module products with advanced technologies at the recent event, including large sized wafers, half cut solar cells, multi bus bar (MBB), bifacial, and perovskite techs. Image: GCL System Integration pv magazine: Over the past two years, GCL has sold several PV plants to China state owned energy enterprises.
