

What to do if solar power generation is not durable

What should I do if my solar panels don't work?

Dust, dirt, bird droppings, or other debris can block sunlight and reduce your system's performance. Regularly clean your solar panels with a soft brush or cloth and water to maintain their efficiency. If your panels are difficult to access, consider hiring a professional cleaning service.

How do I maintain my solar panels?

Regularly clean your solar panels with a soft brush or cloth and water to maintain their efficiency. If your panels are difficult to access, consider hiring a professional cleaning service. Over time, solar panels may experience a gradual decline in efficiency.

When should I fix my solar panels?

Every second your solar energy system is down costs you money, so it's important to fix your solar panels as soon as you notice your solar panels are not producing full power. To help, we've rounded up some of the most common solar panel problems and how to solve them. Need professional solar maintenance in Arizona?

Why are my solar panels not producing enough energy?

Solar panels are a great way to generate clean, renewable energy. However, you may sometimes notice that your solar panel system isn't producing the expected amount of energy. It is important to check for any visible issues, such as shading or dirt on the panels.

What should I do if my solar system underperforms?

Address issues like shading, dirt, and debris on the panels, panel degradation, inverter problems, and system design and configuration. If your system still underperforms, consider adding more panels, upgrading to high-efficiency panels, optimizing energy consumption, or installing a solar battery storage system.

How do I clean my solar panels?

You can clean your solar panels yourself using distilled water and a soft cloth. Just be sure to avoid abrasive sponges, soap, and power washers so you don't damage the panels while cleaning them. If you'd rather not climb up on your roof to clean your solar panels, call SouthFace Solar & Electric for professional solar maintenance and cleaning.

You may have unused generated solar power if your energy consumption is lower than the amount of electricity your solar system produces. This can occur if your energy needs are relatively low, if you are away from home during peak solar ...
