

# Which one has higher salary wind power or power plant

What is the highest wage category in the energy industry?

The highest wage category in the energy industry is in electricity generation and power plant operations. Regardless of the energy source, the pay is similar between fossil fuels and renewables, with solar electricity generation edging out the others. The climate is changing, and our journalists are here to help you make sense of it.

What are the best paying jobs in energy?

And that gap is increasing with some of the best paying jobs now available in wind farms, solar panels, and energy efficiency technologies. Based on my research and looking at the best paying jobs in energy below, average salaries range from \$40,000 at the low end to almost \$110,000 at the high end.

How big is the wind energy industry?

The wind energy industry has experienced rapid growth in the past decade. According to the American Wind Energy Association (AWEA), in 2000, installed wind energy capacity in the United States was under 3,000 megawatts. It is now over 35,000 megawatts, enough electricity to power approximately 9.7 million homes.

What are the jobs in wind power?

Currently, most of the jobs in wind power are in the manufacturing sector, followed by construction, and operation and maintenance. However, as new wind farms are brought online, existing ones are upgraded, and manufacturers are able to take advantage of returns to scale, the other sectors also are expected to experience rapid growth.

What percentage of energy is generated by wind?

In 2009, wind energy made up 1.8 percent of U.S. power generation, an increase from 1.3 percent in 2008. However, wind power accounts for about 50 percent of renewable energy, which includes wind, solar, hydroelectric, and geothermal power, as well as energy from biomass and wood or wood-derived products.

Are more green energy jobs coming?

Energy efficiency accounted for the most jobs in that estimate, with renewable energy generation coming in as the second top employer. Solar energy workers make a large portion of current career pathways in renewable energy, but don't think the possibilities stop there; more green energy jobs are coming.

The highest wage category in the energy industry is in electricity generation and power plant operations. Regardless of the energy source, the pay is similar between fossil fuels and renewables, with solar electricity generation ...
