

# Who is responsible for leaks on roofs with photovoltaic panels installed

Why does my roof leak after installing solar panels?

There are various reasons your roof could leak after installing solar panels. They mostly have to do with poor installation where mounting holes are not sealed properly, the top is incompatible with solar panels, or the roof is old and not designed for solar panels.

How do I fix a roof leak after installing solar panels?

If you're experiencing roof leaks after installing solar panels, contact a professional roofing contractor who specializes in solar panel installations for a thorough inspection. They can identify the source of the leaks and recommend appropriate solutions.

Is it the solar panels that are leaking?

If solar panels are not ideally suited for your roof, poor installation tactics can make your roof leak. Roofs made from wood shingles, clay, slate, and terracotta tiles are particularly vulnerable to leaks and damage during installation.

Can solar panels damage a roof?

Fortunately, roof damage from a solar panel installation is extremely rare because installers take precautionary steps while installing panels to prevent leaks and other damage. Like any home improvement project, using the right service provider is essential to a rooftop solar job.

How do I protect my roof from leaking & damage?

To protect your roof from leaking and damage during solar panel installation, the first thing you should do is hire a qualified solar installer to evaluate your roof and make a plan for fitting the panels. This is the single most effective defense against such issues.

Do roofers know how to install solar panels?

Roofers don't usually have the expertise to measure, drill and install solar panels since their license doesn't allow them to operate in this capacity. They often hire subcontractors to do the actual solar work through either a licensed electrician or solar installer.

It is important to note that roof leak is not directly related to the solar system in most cases. The top reasons for the leak are mainly roof-based ranging from old roof condition, incompatible roof type, prior roof damage, improperly installed ...

If you do not have the perfect roof for solar panels, inferior or inappropriate installation techniques may be responsible for solar panel roof leaks. Make sure not to use terracotta tiles, slate, clay and timber shingles in the commercial ...
