

Wind Blade Power Generation National Project

Could new technology revolutionize wind turbine blades?

Led by NREL senior wind technology engineer Derek Berry, the team's novel techniques could revolutionize how wind turbine blades are manufactured.

What is GE's new rotor blade project?

The second project, led by GE Research, is dubbed AMERICA: Additive and Modular-Enabled Rotor Blades and Integrated Composites Assembly. Partnering with GE Research are Oak Ridge National Laboratory, NREL, LM Wind Power, and GE Renewable Energy.

Should wind turbine blades be repurposed?

As more and more wind turbines are installed every year, new wind turbine blades should be designed to be repurposed or even recycled to prevent them from undercutting the green economy they are meant to help build. Derek Berry and his team of NREL researchers did just that.
