Wind energy resources
Wind farms
Wind power capacity and production
Economics
Small-scale wind power
Impact on environment and landscape
Politics

Wind power is the use of wind energy to generate useful work. Historically, wind power was used by sails, windmills and windpumps, but today it is mostly used to generate electricity. This article deals only with wind power for electricity generation. Today, wind power is generated almost completely with wind turbines, generally grouped into wind farms and connected to the electrical grid.
