Could China's 'all-time high' solar power supply cause a price drop?

Pent-up demand from what one source calls "all-time high" procurement, with China's National Energy Administration approving a third batch of Gigawatt-base power projects, means falling prices could find a floor. According to the China Photovoltaic Industry Association, the country is set to install up to 120 GW of solar power in 2023.

Will China module prices fall?

Buyers will wait as long as their project allows them to do so, explained one veteran market observer, adding that he did not expect falling module prices to level off. OPIS expects significant price volatility ahead as buyers and sellers alike adopt a wait-and-see approach to the China module market's direction.

Why are polysilicon prices so high in Sichuan?

High temperatures in Sichuan caused temporary power restrictions, reducing polysilicon output. This will affect Polysilicon prices in dollar terms are prices for polysilicon with non-China origins in dollar terms, not translated from RMB prices. The high prices for M10 PERC and TOPCon cells is based mostly on those of Southeast Asian origins.
