

How many photovoltaic panels are there in China in 2021?

The total area of photovoltaic panels in China's coastal regions in 2021 was about 510.78 km², and the average PV panel density reached 378.77 m² per km². The photovoltaic panel area in the different regions, and the cumulative grid-connected capacity in 2021 are shown in Figure 6 d.

Are PV panels suitable for large-scale applications in China's coastal regions?

The area of PV panels in China's coastal regions is rapidly increasing, due to the huge demand for renewable energy. However, a rapid, accurate, and robust PV panel mapping approach, and a practical PV panel classification strategy for large-scale applications have not been established.

How can photovoltaic power generation help China's coastal regions?

Photovoltaic power generation is an effective way for China's coastal regions to achieve energy decarbonization and environmentally sustainable development.

Where are photovoltaic panels located in China?

The photovoltaic panel areas in Hebei, Jiangsu, and Shandong were relatively large (132.84 km², 98.35 km², and 93.63 km²), and accounted for about 63.71% of total photovoltaic panel area in the coastal regions. Moreover, these three provinces are the regions with the highest grid-connected capacity.

Can spectral and textural features identify PV panels in coastal China?

Here, we developed a new approach that uses spectral and textural features to identify and map the PV panels there were in coastal China in 2021 using multispectral instrument (MSI) and synthetic aperture radar (SAR) images, and the Google Earth Engine (GEE), to differentiate PV panels according to their underlying surface properties.

Do solar photovoltaic interventions reduce rural poverty in China?

Zhang, H. et al. Solar photovoltaic interventions have reduced rural poverty in China. *Nat. Commun.* 11, 1969 (2020). Wang, M., Mao, X., Gao, Y. & He, F. Potential of carbon emission reduction and financial feasibility of urban rooftop photovoltaic power generation in Beijing.
